

PowerPAC Premium[®]

The Next Generation in Mercury Capture Technology

ADA Carbon Solutions provides novel products, services and supply chain solutions for the emissions control industries bringing you Expertise, Reliability and Compliance

PowerPAC Premium

PowerPAC Premium is a powdered activated carbon (PAC) specifically designed and optimized for removing mercury emissions from the flue gas of coal-fired boiler emissions.

The product utilizes select feedstocks and additives and is produced under tightly controlled manufacturing conditions.

PowerPAC Premium is brominated and has been designed for power plants, industrial boilers and kilns burning bituminous, subbituminous coal (including PRB), lignite or waste and biomass fuels.

Product Benefits

- **Optimized pore structure for effective mercury adsorption**
- **Designed for use with low halogen fuels**
- **Handles and flows well in injection systems**
- **Reduced mercury emissions**
- **Backed by ADA Carbon Solution’s mercury control expertise**

Package and Delivery

PowerPAC Premium can be delivered in 1,000 pound bags or in 42,000 pound pneumatic bulk trailers.

Product Specifications	
Moisture	12 wt. % maximum
Size	95% minimum minus 325 mesh
Typical Properties	
Tap Density	0.5 – 0.7 g/cm ³
Auto Ignition Temperature	Greater than 400°C (752°F)
